

Operating Instructions

P7910 Solar Mole Repeller

Chase unwanted burrowing rodents with the strongest and least expensive power available – The Sun.

Congratulations on your purchase of Solar Mole Repeller. Please read these operating instructions thoroughly before use. It is important for proper use of the product.

Solar powered and maintenance free, the Solar Mole Repeller uses state of the art technology to repel moles, gophers, voles, shrews and other destructive burrowing rodents. The ingenious device is environmentally friendly and eliminates the use of poisons and traps around your children and pets. It generates vibrations in 30 sec intervals within a frequency range of 400 Hz / \pm 50 Hz. It operates in a circular pattern, in an area of approx. 7500 sq. ft. (1/6 Acre) and 96 ft. in diameter. (dependant on condition of soil) This must be an unobstructed 96 ft. Minor obstructions like lampposts are OK. The signals from the unit take advantage of the very acute sense of hearing and sensitivity to ground vibration. Rodents are usually driven away within 7 to 14 days. You may note increased pest activity at first. This is normal. Other useful animals are not harmed. The **Solar Mole Repeller** can be used in the garden, in the field or in other outdoor areas with unwanted burrowing rodents. The finely tuned electronic components and the efficient solar modules keep the unit running even with poor light.

Installation:

Insert the unit into the ground (up to $\frac{3}{4}$ of the rod deep). To turn it on push the button at the bottom of the case. Control the function of the device regularly. Do not force the unit into the ground or hammer the top. You risk damage to the unit.

Technical data:

Case	: weather resistant and waterproof
Effective range	: approx. 7500 sq. ft. (1/6 Acre)
Frequency range	: 400 Hz / \pm 50 Hz
Operation	: On / Off switch
Power supply	: amorph silicium solar cells
Interval	: 2 sec on, 30 sec off (break interval)
Power reservoir	: in darkness up to 7 days
Readiness for service	: immediate operation and charge function even with poor light
Battery	: AA NiCd 950 mAh rechargeable battery (included) (can be changed).

General safety indications:

1. Device must not be used when damage is visible
2. Keep packaging e.g. plastic film away from children
3. **Dispose of packaging and wear materials (films, used products) in an environmentally friendly way.**
