IF SWALLOWED:	<ul style="list-style-type: none"> • Call a Poison Control Center, doctor, 1-800-664-9042 or 1-800-858-7378 immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to by a Poison Control Center or doctor.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15 to 20 minutes. • Call a Poison Control Center, doctor, 1-800-664-9042 or 1-800-858-7378 immediately for treatment advice.
IF IN EYES	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a Poison Control Center, doctor, 1-800-664-9042 or 1-800-858-7378 for treatment advice.

NOTE TO PHYSICIAN: This material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE FOOD OR WATER BY STORAGE OR DISPOSAL.

STORAGE: Store only in original container, in a cool, dry place inaccessible to children and pets and away from products with strong odors.
SPILL: Sweep up and dispose of as directed on this label or dispose of as in PESTICIDE DISPOSAL.
PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
CONTAINER DISPOSAL:
Non-Household use: Completely empty container into application equipment. Then dispose of empty container in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning, if burned stay out of smoke.
Household use: If empty: Do not reuse this container. Place in trash and offer for recycling if available.
If partly filled: Call your local waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

ENVIRONMENTAL HAZARD

This product is toxic to fish and wildlife. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use, in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in **tamper-resistant** bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats, and house mice in and around homes, industrial buildings and similar man-made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with foods. Do not broadcast the bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. For best results remove as much foodstuff, as possible, from the area to be baited.

APPLICATION DIRECTIONS:

For Rats: Apply 2 to 8 blocks (4 to 16 oz. of bait) per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.

For Mice: While wearing waterproof gloves break each 2 oz. block into 3 pieces and place 1 or 2 pieces at 8- to 12- foot intervals. Larger placements (up to 3 pieces (2 oz.)) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

Follow Up: Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and any leftover bait properly. To prevent reinfestation, limit sources of rodent food, water, and harborages as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish with fresh bait as often as needed.

NOTICE: Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
